William,

Following our conversation yesterday I have spoken with Richard Jefferies of Gloucestershire County Council regarding the crossing they require us to install across Barrington Lane. I have agreed with him that all that would be required for the crossing is for us to provide a dropped kerb and tactile paving on either side of the road. I have also agreed with him that the only positions where this crossing could be located is opposite the stopped up Wellington Road as this is the only place with a footpath.

We will update our S278 drawing to show these required works and send them across to Richard Jefferies for comment.

If you have any questions please do not hesitate to get in contact.

Kind regards,

**ANDREW UNCLES**
